Computer Science Students Society

Minutes Wednesday February 9, 2010

President: Jré Sarenac
Attendees: Jré Sarenac, Bert Ong, Jeremiah Tantongco, Mike Kenyon, Kalan MacRow, Cube Officers
Internal Contact: vpa@thecube.ca

Minutes

Vandalism

The Cube office was slightly vandalized last week. No serious damage was done and nothing was lost.

Robot Party

The Robot Party (in association with Cognitive Systems) was a success, thanks to all who attended.

Website

We're still waiting on the new department website template in order to update the cube website. Hopefully we'll have that before the new department site goes live.

Boat Cruise

- We're considering getting a larger boat than last year
- New ticket sales policies will be enforced, 2 subsidized tickets per CS student.
- There is a possibility of Math or Cogs (or both?) joining us for the cruise.

REC and Sports

Look out for the February edition of the REC newsletter, it will be available soon.

Another open skate is being arranged for the end of February.

An evening laser tag event is also in the works for early March. Details are to be decided.

Action Items

VP Internal
- Arrange a supply run sometime before break.
- Look into Hand-washing station requirements (for BBQs)
- Clothing order for sometime following reading break.
- Labels are needed for the grad freezer.

VP Social
- Arrange another AGM to vote on Executive position renaming.

VP Communication
- Look into finances for new cube gear (lanyards, etc)
- Checklist for "last one out of the cube office"
- "Need Change?" sign for the money jar.
- Dates on job postings!
- Update Cube bulletin board and calendar

Minutes	**Action Items**

Upcoming REC events include a Storm the Wall team as well as Ultimate.

BBQs

BBQs will commence again following reading break.

Jre brought the Cube officers up to speed on our new relationship with the AUS.

SUS

SUS is trying to make new policy depriving club representatives of their vote. This won't be devastating for the Cube because there are already multiple CS reps, however, it still concerns us.
